

The sealed conjunct and its verdicts

	criterion (pre-registered)	observed (primary family)	verdict
(a)	$ \Delta\text{margin} $ at every knife-edge > max over ALL nulls	H2 0.0798 vs null-max 0.2254	FAIL
(b)	null flip-rate on knife-edge set $\leq 1/10$ (escalate at 0-1/10)	8/10 nulls flip, all into H2's exact destination	FAIL
(c)	in-vivo dose curve outside the null band at every checkpoint	(a)+(b) decisive — moot	moot
(d)	effects concentrate on weekday set vs off-circuit negatives	p4 at 4/10 = MIXED band (seal 2) AND arm fails → capability language demoted. Ruling: unattributed perturbation (Branch B, by rule).	MIXED
